Chip, below are some suggestions re initial approval option for gainful employment we discussed on Monday. All the data must demonstrate that the program will prepare students for gainful employment in a recognized occupation:

-projected ratio of debt to earnings shows earnings sufficient to repay debt

- projected earnings greater than 150% of poverty level

-has programmatic approval generally needed to sit for state licensure exam or private certification exams

-training at that level is required to obtain employment in the SOC codes identified

Data supporting these items to be obtained in reliable and valid survey conducted in same manner DE proposed for salary surveys for earnings alternative data or other reliable and verifiable documentation to be discussed.
