I have been advised that this e-mail will be honestly considered by interested factions and placed in review for legislators. You test my sense of humor. If any of you or them really cared, this outrageous situation would not exist. Those who've been carrying the "Depend On Government" ball for many years have indoctrinated all new participants to believe Government knows what is best for United States Citizens, young and old. When President Roosevelt introduced public programs for our country, would you not expect he and his advisers knew how much control they would then have over those they helped in that very bad situation? To deny that fact would be to admit ignorance of humanity and psychology! The United States Government and Department of Education (Among Many Others) have consistantly contributed to welfare similar programs which entice unqualified persons to accept monies to further their education agenda without knowing if they have one. Giving money to a person who will buy a motorcycle, not enrollment, is not different than giving a mortgage to any person or couple who cannot, under any circumstances that exist, begin to payback a financial institution for a Government Guaranteed Loan. You've taken away the institution's responsibility to ensure the re-payment, and therefore the background inspection that would be required to become a Government Employee. If you have ovaries enough to attempt to correct this "In Public Agenda" millions of this countries citizens will help you regain the respect officials have lost. I wish all of you well! [REDACTED]

Hello: I've previously attempted to respond to this address however was unable to receive an input facility. Glad your there now. I've previously responded to an inquisition that the elected officials of this Country would better serve someone else's interest if they stopped giving our citizens financial opportunities that they have no way of repaying. I will always appreciate my parents loaning me a few dollars, or even more, not really expecting to get that loan back, however officials elected to represent all of us find it seemingly thoughtful to continue giving to situations that are unfruitful. I don't elect people who intend to take from me through taxes and give to someone else, who in many many, etc., cases most of our society knows about, but is to deathly afraid to offend. Officials will continue to take my Social Security Funds, (I began delivering papers at age (9) nine.) Our Country will continue to forgive millions of dollars in loans to countries who constantly show their contempt for our Nation, to allow a small display of Naval Back-up, or other Military Representation. The amount of money that has been restricted from my Social Security is very close, if not fulfilling, my initial debt of \$8,481.38. Would you expect any normal person employed by the Government telling thier Supervisor, [REDACTED] [REDACTED] has paid his original debt, should we find-out how to forgive the interest and fees so he can receive the rest of his Social Security Check?" Hardly, the U.S. Government continues to hire employees, and my pittance continues to show this country where I, and others, stand. There isn't any need to be an "Intellectual Giant" to understand these sentences, just the desire too! Thank You (Whoever You Are.) I appreciate the opportunity. [REDACTED]
