Subject: Title IV Funding Statement

My name is [REDACTED] and I submitting this statement on Title IV funding.

In my humble opinion I hope that the reigns are not being tightened on federal funding at this day and time. Without federal funding I would have not been able to attend college. I work full time and my income is very limited. I also want to acquire my MBA in the next 18 months.

Todays economic status should move the federal government to make available every resource for committed individuals to go to college. Human resources are a companys most valued asset. Highly trained individuals can only be developed from professional training such as a college forum and environment.

Whatever you do please consider the less fortunate individuals, working individuals being pushed by employers to get more education to advance, single parents of minor children trying to position themselves for the future.

Technological adavances has also forced babyboomers that may have acquired their degrees sometime ago to retrain to be as competitive as the newly graduated student that is in their 20's. Funds and resources need to be there for all.

Thank you for considering my statement...
